- Sunken relief is created by carving an image below the surface. – TRUE
- Bas relief (low relief) means the figures are deeply raised from the background. – FALSE
- Carving is an additive process in sculpture. – FALSE
- Casting involves pouring a liquid material into a mold to harden. – TRUE
- Molding uses hard materials like granite and marble. – FALSE
- Assemblage refers to joining different materials to form a sculpture. – TRUE
- Martin Puryear is known for using carved wood only in his sculptures. – FALSE
- An armature is the supportive skeleton framework inside a sculpture. – TRUE
- The base is the part of the sculpture that supports it. – TRUE
- Craftsmanship refers to poor-quality workmanship in art. – FALSE
- Plaster of Paris is a black powder used for metal casting. – FALSE
- A freestanding sculpture is intended to be viewed from all sides. – TRUE
- A statue is a small-scale sculpture meant for private viewing. – FALSE
- The Spring Temple Buddha is the world's tallest statue. – TRUE
- The Trevi Fountain in Italy is an example of architectural sculpture. – TRUE
- Sculpture techniques are either additive or subtractive. – TRUE
- The main subjects of sculpture are human bodies and animals. – TRUE

- Early sculptures were made to help trackers and honor gods. – TRUE
- Sculptures are only found in art museums. – FALSE
- Sculptures can also serve as decorative items or valuable investments. – TRUE
- Art and music - fundamental functions and essential parts of human life
- Music - can express different moods and emotions.
- Harmony – From the Greek harmonia, meaning "joint or agreement, it refers to the verticalization of the pitch.
- Key – It is known as tonality, a principle in music composition wherein there is a feeling of completion at the end of the piece by going back to the tonic.
- Melody – From a Greek meloidia, which means "singing" or "chanting, it refers to the tune of a song or piece of music.
- Pitch - It refers to the perceptual property that allows the ordering of sounds on a frequency-related scale either relative lowness or highness.
- Rhythm – It comes from a Greek word rhythmos, which means "any regular recurring motion." It is the pattern of the sound in time and beats in music.
- Tempo – It regards the speed (slow or fast) of a given piece of music.
- Texture – It refers to how the harmonic materials are combined in a composition. It could be monophonic (single melodic line), polyphonic (two or more or homophonic (the main melody accompanied by chords).
- Timbre - It refers to the quality of the sound (tone) that distinguishes one voice or instrument from another.
- Song – A composition for a voice or voices, performed by singing
- Arrangement - is a reconceptualization of a previously composed work.
- Beat and Rhythm - beat is the speed (tempo) of the song that drives the listener to feel either fast or slow. On the other hand, the rhythm is the beat that the various instruments such as bass, drum, and guitar have produced.
- Chords (Chord Progression) – It refers to any harmonic set of pitches used to accompany the melody of the song.
- Concept (Story) - All songs have a storyline. The title of any song will convey the essence of that story idea, and the words (lyric) will expound upon that idea.
- Genre and Style - genre of the song, such as pop, hip-hop, punk rock, or country, and alternative type of music is established by the beat and rhythm of the song.

- Length - length of a song is always considered, depending on its use and can be shorter or longer, but this is the typical length of today's musical arrangement.
- Lyrics - term comes from the Greek word lyrikos, which means "singing to the lyre." It describes a concept of a theme which rhymes in the sections of music.
- Melody - is the harmony of the song. It is the main line of music and the basis of the song.
- Song Sections - Songs are divided up into sections or components such as intro, verse, chorus, bridge, lead breaks, etc.
- Classical Music - is a sophisticated form of composition as it requires skills like learning the ability to coordinate with other musicians.
- Folk Music - reflects the emotions of ordinary people. Cultural and popular music are the two sub-genres of folk music.
- Funk - became popular in the late 1960s. Funk made rhythm the essential element while deemphasizing melody.
- HipHop Music - always includes the use of an instrument such as bass, drums, guitar, piano, violin, and fiddle
- Jazz - Sophisticated and strong beats feature this type of music. Main instruments used for this type of music are cornet, trumpet, or violin.
- Meta Music - wherein the melody is influenced by the structure of the songs (known as "information music").
- Opera Music - a fantastic combination of theatrical art and musical invention and is played explicitly in big audiences.
- Rock Music - requires the vocals to be accompanied by bass, drums, and guitar. Sometimes, piano, synthesizer, saxophone, flute, mandolin, and sitar are also in this genre for a more profound impact.
- Techno Music - (known as a fusion type of music.) This is a form of electronic dance music based on African-American music styles like electro-jazz and funk.
